

TESTIMONY

2022-2024

Testimony charts the experience of faith in relation to a life's journey. For the believer an authentic relationship with Jesus brings a revelation of Love, manifested through *lived experience*. The artist, a qualified occupational therapist, developed a tool to aid the process of capturing a life story; graded highs and lows of the lived experience, in 7 year periods, from birth to present day.

In collaboration with 18 believers, the work represents a six month process undertaken by each individual to know and take ownership of their life story and reflect their individual journey of faith through that journey. These testimonies were then scribed by light against the South African sky in the location each person identifies as home.

And they will overcome the accuser, by the blood of the Lamb and the word of their testimony

Revelations 12:11.
